

DELL LATITUDE E-FAMILY DOCKING AND ACCESSORIES

Creating a quick transition from mobile freedom away from the office to full desktop productivity at your office desk, Dell E-Family docks, stands, and accessories enable seamless mobile-to-desktop expansion.

E-PORT DOCKS FOR UNLIMITED MOBILITY

All Dell Latitude and Dell Precision E-Port and E-Port Plus port replicators offer a generous number of ports for you to connect to desktop ports and peripherals. This peripheral commonality and long product life cycle is built into the DNA of all Latitude and Dell Precision laptops. Instead of attaching cables every time, you can connect to networks, keyboards, monitors, and other peripherals almost instantly. Both port replicators support hot docking and undocking.

E-View Laptop Stand

E-VIEW LAPTOP STANDS FIT ANY WORKSPACE

Customized for Dell port replicators, the E-View Laptop Stand features adjustment design, which allows easy adjustments for both height and distance. The E-View Laptop Stand is also a perfect companion to any flat panel. By leveraging the native LCD of your laptop, you can enjoy the productivity gain of an easy dual display setup.

EASILY ADJUST WITH THE E-FLAT PANEL STAND

In addition to port replicators, the Dell E-Family also offers a broad range of stands and accessories to help you create a dynamic office. The stylishly designed E-Flat Panel Stand is built with usability in mind. This stand offers wider swivel angle horizontally and an automatic weight-regulated height adjustment mechanism that makes height adjustment as easy as a gentle push. The E-Flat Panel Stand is customized to accept both E-Port and E-Port Plus, supports LCD panels up to 24", and, through an E-Vesa Connector, can connect a third-party flat panel.

E-Flat Panel Stand

STAY MOBILE WITH THE E-MONITOR STAND

Designed with improved accessibility, the E-Monitor Stand features a front-access power on/off button and also comes with a front eject button. This stand is designed to hold up to a 75-lb. CRT monitor or an LCD flat-panel monitor.

E-LEGACY EXTENDER MOBILE PORTS

Designed for the on-the-go IT professional or field technician, the E-Legacy Extender can be snapped onto your E-Family notebooks through the docking connector and adds little weight to your system (0.45 lb. or 0.21 kg). It is ideal for those who still rely on legacy ports (serial port, parallel port, or PS/2 port) regularly.
