

DELL PowerEdge T610

THE NEW 2S POWEREDGE T610 EXCEEDS 4S PERFORMANCE WITH UNPARALLELED PRICE/PERFORMANCE!

The Brand New Dell™ PowerEdge™ T610 has the Best (lowest) Price/tpsE on the TPC-E Benchmark¹

- The PowerEdge T610 offers a great balance of performance and value for running Microsoft® SQL® Server 2008 databases
- **Dell now holds 3 of the top 5 price/performance positions in TPC-E!**
- The 2-socket PowerEdge T610 offers **higher** database performance than the **4-socket** IBM System x3850 M2!
- The PowerEdge T610 is a great choice for small-to-medium businesses or branch offices

TOP TPC-E PRICE/PERFORMANCE RESULTS AS OF MARCH 30, 2009

Rank	Company	Platform	Processors	Price/performance (\$/tpsE)	Performance (tpsE)	Availability
1	Dell	PowerEdge T610	2xIntel Xeon X5570	\$334.09	766.47	3/30/2009
2	Dell	PowerEdge R905	4xAMD Opteron 8384	\$403.87	635.43	2/19/2009
3	IBM	System x3850 M2	4xIntel Xeon X7460	\$457.27	729.65	10/10/2008
4	FSC	PRIMERGY RX600 S4	4xIntel Xeon X7460	\$459.71	721.40	1/1/2009
5	Dell	PowerEdge R900	4xIntel Xeon X7460	\$500.55	671.35	9/15/2008

BENCHMARK DESCRIPTION

The TPC Benchmark E (TPC-E) is an On-Line Transaction Processing (OLTP) workload. It is a mixture of read-only and update intensive transactions that simulate the activities found in complex OLTP application environments.

Dell believes TPC-E is a much more up-to-date and relevant workload than TPC-C.

TPC and the benchmark name TPC-E is a registered trademark of the Transaction Processing Performance Council. For the most current results please visit www.tpc.org.

¹ Based on published TPC-E price/performance results as of March 30, 2009. See <http://www.tpc.org/> for current results.
