Why get trained on Dell™ Technology?

- Gain knowledge and experience on Dell hardware and the most common technology applications!
- Help increase speed of integration.
- Help decrease time to NCLB compliance.
- Help improve site availability, scalability and security by fully educating your teachers, administrators, and IT staff on Dell PCs, notebooks, software, servers, and storage.

Benefit from Dell’s Technology Expertise, Research and Testing

When it comes to technology, knowledge is power. A well-trained staff can make your technology integration programs relatively flawless. With the proper training from Dell, your staff can make the most of any Dell technology investment. This will help you to more quickly meet the requirements for NCLB legislation by increasing technical proficiency of educators and administrators, and integrating technology in the curriculum. You can utilize Dell’s ongoing training to keep abreast of new hardware, software, and Enterprise technologies, and to learn how to integrate that technology into your existing learning environment.

We offer specialized technology and applications training online or at your location. For Enterprise systems training, we deliver courses in our Enterprise Technology and Education Center (ETEC) or directly on your site. Our training workshops can provide you with the opportunity to learn the intricacies of modern technology, and help students, teachers, and administrators understand the value of using technology in education.

Computer Applications Training - Online

The Dell Computer Applications Training – Online program is a series of online courses, specifically chosen to meet the needs of educators as they integrate technology into the curriculum. These courses cover the most popular computer applications shipped with Dell systems like Microsoft® Windows® XP and Project® 2002. The participants get access to these self-paced courses for one full year and receive online mentoring and support for their learning experience. Technical support is also available to help with any issues that may arise. The ability for teachers to use computer applications in the classroom is enhanced by this training opportunity.

Program Features

- Basic PC Fundamentals
- Windows 2000, Complete Curriculum
- Office 2000 (Word, PPT, Outlook, Excel), Complete Curriculum
- Windows XP, Complete Curriculum
