You Will Learn:
- Relational Database and SQL Overview
- How to Use Oracle SQL*Plus
- SQL Queries - The SELECT Statement
- Scalar Functions
- SQL Queries - Joins
- Aggregate Functions and Advanced Techniques
- Data Manipulation and Transactions
- Data Definition and Control Statements
- Database Design Concepts
- SQL Subqueries
- Hierarchical Queries
- Object Types
- Times, Dates, and Strings
- Temporary Tables
- SQL Tuning Tools
- Indexes
- Oracle Analytic Functions
- Data Warehouse Features
- Formatting Reports with SQL*Plus

Who Should Attend:
- Application developers
- Database administrators
- System administrators and users who write applications and procedures that access an Oracle10g database

Recommended Prerequisites:
- None

Instructor-Led Training Includes:
- Each student receives a course manual which includes step-by-step instruction and practice labs

Course Length:
- Five days

Oracle 10g SQL Programming is a five-day course where students will learn how to create, retrieve, and manipulate objects in Oracle10g Structured Query Language (SQL). Students will also be introduced to Oracle10g database features and tools. Students will go on to develop deeper insight into relational database design and RDBMS operation, learn concepts and specific SQL syntax for extended Oracle data types, learn analysis and tuning techniques to increase SQL performance, and master advanced features of Oracle SQL for large data sets and data warehouses.

COURSE DETAILS:

- Relational Database and SQL Overview
- Scalar Functions
- Using Oracle SQL*Plus
- SQL Queries - Joins
- SQL Queries - The SELECT Statement
- Aggregate Functions and Advanced Techniques
- Data Manipulation and Transactions
- Data Definition and Control Statements
- Stored Procedures and Functions
- Other Database Objects
- Database Design Concepts
- SQL Subqueries
- Times, Dates, and Strings
- Temporary Tables
- SQL Tuning Tools
- Oracle Analytic Functions
- Data Warehouse Features
- SQL Tuning
- Formatting Reports with SQL*Plus
- Indexes
- Appendix A - The Data Dictionary
