Industry briefs on the latest software product and pricing changes, licensing updates and more

JANUARY 14, 2009

Includes news items from McAfee®, CA, Symantec™, and Novell®.

MCA FEE

NEW RELEASE: MCA FEE® TOTAL PROTECTION FOR SECURE BUSINESS

McAfee® Total Protection for Secure Business includes critical elements of security that most medium-size companies need, such as McAfee's best and most comprehensive security for endpoints, email, web usage and data. McAfee Total Protection for Secure Business can save time, save money, and provide strong defenses against today's complex threats. With built-in intelligence, it is designed to protect your organization from the threats you know about, and the threats you may not see coming. [Check out the video.](#)

CA

ANNOUNCING CA ERWIN® MODELING R7.3

CA is proud to announce the latest iteration of CA ERwin® Modeling r7.3, a solution for your database design and modeling efforts. This new release adds new features, products, and integrations which can allow you to customize and incorporate data modeling into your daily workflow.

SYM ANTEC

NOW AVAILABLE: SYMANTEC™ ENDPOINT ENCRYPTION 7.0

Symantec™ Endpoint Encryption is designed to provide advanced encryption for desktops, laptops, mobile and removable storage devices. It offers scalable security and helps prevent unauthorized access to endpoints. New features in the Full Disk Edition 7.0 include enhanced non-domain endpoint support, a new web based communications system, Microsoft® SQL® Server Support, and complete Novell and LDAP Integration.

NOW AVAILABLE: SYMANTEC MULTI-TIER PROTECTION AND NETWORK ACCESS CONTROL 11.0.4 MAINTENANCE RELEASE UPDATE

The 11.0.4 update provides enhancements to existing 11.0 functionality to add Symantec Endpoint Protection Manager support for the Microsoft® Windows® 2008 Server operating system. Fixes and performance enhancements since the initial release of version 11.0 will also be included in this release. If you have current maintenance, use your existing Multi-tier Protection and Network Access control serial numbers to [download the latest release here.](#)

NOVELL

NOVELL® MLA DISCOUNT REVIEW

Novell® will reset volume discounts provided to MLA Customers worldwide, effective February 1, 2009, based on the annual purchasing criteria. Any MLA customer spending less than \$1 million annually will either be transitioned to Novell's VLA program or reset to MLA Discount Level 1. An MLA customer's annual spend includes the MLA Parent customer's spend and also the annual spend of all associated MLA Members.

NEW RELEASE: NOVELL ACCESS MANAGER™ 3.1

Novell Access Manager™ 3.1 provides a number of new enhancements which can extend the product's federation capabilities, improve management, enhance security, and add cross-platform capabilities to major components. Key features include:

- Support for WS-Federation and Information Cards
- Cross Platform Identity and Administration Servers (Windows and Linux)
- Improved Administration Interface, which includes Delegated Administration

NEW RELEASE: NOVELL PLATESPIN® ORCHESTRATE 2.0

Novell has announced the availability of PlateSpin® Orchestrate 2.0 (formerly Novell ZENworks® Orchestrator) which helps data center managers to align IT resources to business needs. It is designed to provide resource usage optimization via policy-based automation and heterogeneous virtual machine life cycle management. New features include extended hypervisor support, integration with LDAP databases for user management, NPIV awareness to allow VMs to migrate freely without losing access to zoned storage, and improved scalability for servicing hundreds of VM hosts.

DELL
