

# ADVANCED EDUCATION TECHNOLOGY FROM DELL AND ARUBA NETWORKS

## EXPAND NETWORK ACCESSIBILITY WITH THE ALL-WIRELESS DISTRICT

The all-wireless district (AWD) from Dell and Aruba Networks allows teachers, administrators and students to access the internet or school network easily and securely, from almost anywhere in a school. It promotes active learning in the classroom and allows district staff members to access business-critical applications with mobile devices. This innovative WLAN can also support video surveillance, Voice over Internet Protocol (VoIP), wireless IP projectors and wireless cart technology.

### KEY BENEFITS INCLUDE:

- Install with plug-and-play Access Point (AP)
- Secure easily with integrated firewall and end-to-end encryption
- Add APs anytime, anywhere
- Operate as self-healing radio network
- Add voice and video services easily
- Extend the network without wires, using wireless mesh

## PARTNERING WITH DELL TO ENHANCE THE LEARNING ENVIRONMENT

Aruba Networks partnered with Dell to benefit from Dell's exceptional, standards-based technology, multiple financing options and robust support services. The all-wireless district is a comprehensive solution that is easy to deploy and maintain.

## THE RIGHT BUNDLE FOR YOUR DISTRICT'S WIRELESS NEEDS

Depending on the size of your school and the types of courses offered, we can recommend different bundles of Dell software, hardware and peripherals.
