

Novell® ZENworks® 7 Linux Management – Dell™ Edition

Novell® ZENworks® 7 Linux Management – Dell Edition is the first fully integrated Linux® systems management solution for Dell PowerEdge™ platforms. Whether you run Red Hat® or SUSE® Linux you can now deploy and maintain hardware, operating systems and applications from a single console.

Novell ZENworks 7 Linux Management – Dell Edition is a product you want to take a look at. Here are seven reasons why:

1. It's made specifically for Dell servers.

You can use Novell ZENworks 7 Linux Management – Dell Edition to automate server updates, keeping your systems current with BIOS and firmware updates directly from Dell. In fact, ZENworks Linux Management delivers centralized control over most aspects of Linux systems management: device configuration, lockdown, patching, software management, imaging, remote management and inventory. ZENworks Linux Management – Dell Edition is also integrated with the Dell OpenManage - toolkit to help reduce the burden of management tasks.

2. It's what Dell recommends.

When you opt for Linux on Dell servers, Dell suggests you use Novell ZENworks Linux Management – Dell Edition. It's a fully integrated Linux systems management solution for Dell servers running Linux.

3. It manages popular Linux distributions.

Whether you prefer to use Red Hat or SUSE Linux Enterprise Server from Novell, ZENworks Linux Management – Dell Edition has you covered. This versatility gives you more options.

4. It delivers a quick, substantial ROI.

With Novell ZENworks Linux Management, you won't have to wait long for your investments to pay off. According to an IDC white paper, sponsored by Novell, for the IT customers with ZENworks Solutions who were interviewed, "the average cost savings were found to be \$355,028 per 100 users, with an average three-year return on investment (ROI) from deploying ZENworks of 1,012%."*

5. It helps slash Linux management costs.

Why devote time and effort to painstaking, error-prone, manual administration? You can use Novell ZENworks Linux Management – Dell Edition to automate the deployment and maintenance of Linux servers and workstations. It helps reduce human error and management time by automating routine Linux-configuration tasks.

6. It's backed by Dell and Novell.

Both companies have traditions of excellence in customer service and support. Backed by Dell and Novell, you can be confident that your multiplatform systems are of the highest quality and supported by talented, responsive technology engineers.

7. It's an award-winning Linux-management solution.

Novell ZENworks Linux Management won LinuxWorld's "Best Systems Management" Product Excellence Award in both 2004 and 2005**. It is one of the most versatile and powerful Linux management solutions on the market today.
