Instructor Sessions - Automation with VxRail

Session Duration
4 Hours

Modality
Live Learn

Audience
VxRail practitioners and administrators interested in acquiring specialist skills in VxRail automation

Prerequisite Requirements
Familiarity with PowerShell, vSphere, VxRail and Ansible is recommended

OVERVIEW

VxRail offers dozens of APIs that can be used to simplify and automate many tasks for essential operations that you may already be performing today, such as initial deployment, expanding the cluster, life cycle management, collecting inventory details, and performing health checks.

There are plenty of automation tools to leverage as well, such as PowerShell modules and Ansible modules that enable IT administrators to automate and orchestrate VxRail configuration and management.

This session is based on VxRail version 7.0.241. Hear directly from the VxRail team about new capabilities and what's on the roadmap for VxRail new releases and the latest advancements.

During the session you will:

- Learn about the VxRail ecosystem and leverage its automation capabilities
- Elevate performance of automated VxRail operations using the latest tools
- Experience live demonstrations of customer use cases and apply these examples to your environment
- Increase your knowledge of VxRail API tools such as PowerShell and Ansible modules
- Receive bonus material to support you in your automation journey

SUBJECT MATTER EXPERT

Rob Hoey – Global Lead Instructor, VxRail

Rob is a lead instructor specializing in Hyper-Converged Infrastructure (HCI) and Converged Infrastructure (CI). He enjoys helping customers, partners, and internal employees realize the potential of our products, services, and solutions.

Rob has worked in a variety of roles including support, service readiness, and training and enjoys leveraging technical solutions to their fullest extent.

Live chat moderated by **Doug Maltais – VxRail Instructor**

Doug Maltais is a Senior Technical Instructor with more than 20 years of technical expertise at Dell Technologies. Doug is a subject matter expert on HCI/CI.
