

CHOOSE YOUR PATH TO SUCCESS

DELIVER THE DIGITAL WORKSPACE TO YOUR ORGANIZATION

See how this consumer-simple, enterprise-secure solution meets the needs of your end users, lines of business, and IT department.

WHAT DO YOU NEED?

Identity

Consistent, contextually based experience across devices

You need single-sign-on access to applications from any device.

You want to enable secure access to corporate resources in support of Office 365 and BYO initiatives.

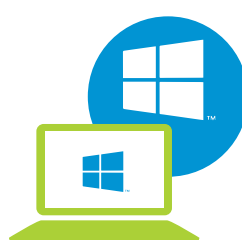

Unified Endpoint Management

Management and security unified across desktop and mobile

You need to manage, monitor, and support all desktops and devices—BYO and corporate owned—in a single, secure solution.

You want to take advantage of Windows 10 capabilities and automate app distribution and updates on the fly.

Windows Apps and Desktops

Seamless application delivery to end users

You need flexibility and freedom to choose the model that best meets your budget—on-premises, cloud service, or hybrid deployment.

You want Windows delivered as a service so IT can maximize productivity, and keep costs under control.

Mobile Productivity

Collaboration across all devices

You need employees to get more done with less hassle.

Your employees want to use apps already familiar to them.

VMware Workspace™ ONE™ combines identity and mobility management to provide frictionless and secure access to all the apps and data employees need to work, wherever, whenever, and from whatever device they choose.

Workspace ONE ESSENTIAS

You want a single place for employees to access their apps.

- Simple, comprehensive App Catalog/ SSO Launcher across any device.
- Self-service access and password management to reduce tickets.
- Integrated Multi-Factor Authentication for system of record apps.

Workspace ONE STANDARD

You want to be able to wipe data and enable mobile application management, while ensuring the identity behind each app is secure.

In addition to the features of Workspace ONE Essentials:

- Optimized mobile experience (One Touch Mobile SSO).
- Secure, enterprise optimized email and messaging.
- Ensure basic device compliance.
- Contain corporate files with DLP while collaborating with colleagues.

Workspace ONE ADVANCED

You want advanced compliance controls, even for unmanaged devices.

In addition to the features of Workspace ONE Standard:

- Unified Endpoint Management
- Device Management and Configuration
- App Wrapping and AirWatch SDK
- Mobile App Security
- Device Compliance and Enforcement

Workspace ONE ENTERPRISE

You want to securely layer virtual apps and desktops.

In addition to the features of Workspace ONE Standard and Advanced:

- Virtual Apps and Desktops

LET VMWARE HELP YOU FIND THE RIGHT PATH.
