

Dell PowerEdge SC1420 Server

The Dell™ PowerEdge™ SC1420 is a general-purpose, dual processor tower server that brings value-price performance, expandability and deployment flexibility to the small business customer.

Value-Price Performance

Designed to address the needs of small businesses for a file/print, small workgroup, e-mail, web or dedicated application server, the PowerEdge **SC1420** cost-effectively delivers the latest technology features pertinent to small business computing needs.

This tower server includes up to two Intel® Xeon™ processors for high clock speeds up to 3.4GHz and impressive data bandwidth with an 800MHz Front Side Bus. It also provides next generation memory technology and dual channel memory architecture which are designed to improve system performance. Plus, PCI Express™ slots help optimise performance and deliver investment protection. These slots offer serial, or point-to-point, connectivity so that each device has a dedicated connection without sharing bandwidth. The end result is outstanding performance.

Expandability

The PowerEdge **SC1420** incorporates plenty of room to expand. You can add up to four hard drives, up to 8GB of SDRAM and up to two additional Network Interface Cards as your business grows. And when advanced operating systems are available, such as those supporting 64-bit technologies, the server has the processor and chipset to support these new developments. The PowerEdge **SC1420** RAID options also include support for emerging Serial ATA (SATA) storage interface technology and SCSI RAID. Both solutions offer a cost-effective way to add availability to the server.

Deployment Flexibility

Built with the growing needs of small businesses in mind, the PowerEdge **SC1420** allows you to design a system that meets your budget today, yet provides options for change tomorrow. You can increase memory, add a second processor, add internal HDD storage, increase optional RAID support and internal tape backup support as well as include optional removable media devices like CD-ROMs, DVDs and diskette drives. The PowerEdge **SC1420** gives you the flexibility to purchase and deploy just what you need when you need it.

Tailored to fit the server requirements of small businesses, the PowerEdge **SC1420** delivers the latest technology, value-price performance, deployment flexibility and expandability so that you can devote resources to your specific requirements.

DELL ENTERPRISE SERVICES

By leveraging the proven advantages of our direct model, including tailored service and support, low cost and a single point of accountability, Dell Services can provide you with fast, effective, affordable service offerings at any point in your IT process. By doing so, we offer a combination of bundled best practices and tailored solutions that work together to provide maximum value to you. Whether you need support, deployment, training and certification programmes, or professional consulting services, individually or bundled as a total package, Dell promises to be your single point of accountability at all times.

Professional Services

Dell Professional Services enables Dell customers to optimise ROI by leveraging complex technology through the design, development and deployment of innovative, robust and scalable business-critical solutions. With each engagement, we utilise our proven methodology and project management expertise to understand your business objectives, design plans that are flexible to adapt to your current environment and then deliver the desired results.

Deployment Services

We bring you deployment assistance that delivers true value from beginning to end. Dell can tailor systems to our customers' specifications by customising the hardware and software configuration during the initial system-build to reduce redundancy and time. We can manage the delivery, installation and disposal of your assets with the same eye for efficiency.

Training and Certification

Our approach to Training and Certification allows you to outsmart your competitors — not outspend them — with industry-standard learning across Dell hardware and industry-standard software. Dell can assist you wherever you need us, whether on-site, online or in a classroom setting, to help your organisation take full advantage of information technology.

Enterprise Support Services

Technology is a significant investment, and it pays to have a partner who can help you minimise costly down time. Dell provides tiered support service packages with the flexibility to customise the offering to meet your specific needs across a wide range of computing environments. With proactive and reactive support options which include hardware and software support with varied response levels, account management and remote resolution, Dell provides support solutions that meet your needs, cost-effectively.

FEATURES	Dell™ PowerEdge™ SC1420 Server
