You Will Learn To:

• Maximize the impact of technology on student learning
• Plan, implement and monitor a data-driven professional development plan that will help teachers integrate technology into instruction and learning
• Set building and district policy to ensure responsible use by students and teachers of available technology
• Lead the deployment of a large-scale technology and professional development initiative
• Create and communicate a vision for technology in your building or district

Who Should Attend:

• Administrators
• District staff

Study Materials:

• Print workshop guides
• Research resource book

Course Length:

• One to five days

District and building leadership is essential to ensuring that technology investments impact student achievement. Dell Leadership training and consulting prepares district and building leaders to lead faculty to the effective use of technology and the achievement of student goals. By the end of the course, participants are prepared to drive change in instructional use of technology and school or districtwide technology priorities.

COURSE OBJECTIVES:

Dell Leadership Training programs are customized to the needs of your district, schools, and leaders. Programs can last as little as a day, occur in a multi-day seminar format or occur across the course of the school year on multiple days. Training program topics can include:

Planning and Monitoring Professional Development
• Using student performance data and data on teacher instructional practice to identify professional development needs
• Developing, leading, and monitoring a professional development plan
• Translating research on professional development and instruction and technology use into practice

Supporting Classroom Use of Technology
• Understanding technology use within the context of teaching and the stages of teacher technology adoption
• Assessing models of effective technology use in the classroom and leadership support strategies
• Reviewing classroom observation tools tied to NETS and instructional practice research to coach teachers around instructional practice and technology use
• Reviewing the research on student achievement, 21st century skills, and technology
• Tying technology to standards-based instruction

Administrative Technology and Technology Use Deployment Policy
• Determining building or district policy around student and teacher wireless notebooks
• Assessing fundamentals of school legal issues related to technology and the internet
• Setting an effective and efficient plan for large-scale deployments of technology
• Creating and communicating a vision for technology use within the building or district
• Implementing building-based support structures for technology and integration of technology into teaching and learning
