Includes:
- 4 days intensive training on Red Hat Enterprise Linux
- Hands-on labs and exercises
- One workstation per student

Who Should Attend:
- System administrators, consultants, and other IT professionals responsible for the planning, implementation, and maintenance of network servers

Recommended Prerequisites:
- RH253, RH300, or RHCE certification or equivalent work experience

Study Materials:
- Student materials, study aids, handouts

Course Length:
- Instructor-led: 4 days

COURSE DETAILS:
- Mastering basic service security
  - Review of host security
  - Advanced TCP wrappers configuration
  - Advanced xinetd configuration
- Understanding cryptography
  - Overview of cryptographic techniques
  - Management of SSL certificates
- Logging system activity
  - Clock synchronization with NTP
  - Configuring centralized syslog management
- Securing BIND and DNS
  - Name server topology and “views”
  - Configuration of appropriate recursion and response policies
  - Using TSIG authentication keys
  - Running BIND in a chroot environment
- Network user authentication security
  - Managing portmap and NIS risks
  - Using Kerberos authentication
- Improving NFS security
  - NFS security limitations
  - Configurations to avoid

Red Hat Enterprise Security: Network Services goes beyond the essential security coverage offered in the RHCE curriculum and delves deeper into the security features, capabilities, and risks associated with the most commonly deployed services.
