

Dell™ OptiPlex™ FX160 Operating System Passwords

Microsoft® Windows® XP Embedded (XPe)

Default Passwords

CAUTION: The user name and password security feature in Windows XPe helps you to protect your computer against unauthorized access by those who might extract your personal information or damage the system. It is recommended that you change your operating system user names and passwords frequently to maintain the effectiveness of this security feature. Refer to your operating system documentation for more information.

Computer systems with a factory installed Windows XPe operating system, and those with a restored version of the factory installed Windows XPe operating system, are initially set up with the following user names and passwords:

For administration privileges:

User Name: Admin1 OR Administrator

Password: dell

For user privileges:

User Name: User1

Password: password

October 2008

0N525MA00

Changing User Names and Passwords

NOTE: To add/remove/change the privileges of user with Administrative or user privileges, you must be logged into the operating system with administrative privileges. If you are logged into the system with user privileges, you can change only your password.

- 1 Click **Start**→ **Settings**→ **Control Panel**→ **User Accounts**.
- 2 Click the user name whose password or privileges you want to change, and follow the on-screen instructions.

Novell SUSE Linux Enterprise Thin Client (SLETC)

Default Passwords

CAUTION: The user name and password security feature in SLETC helps you to protect your computer against unauthorized access by those who might extract your personal information or damage the system. It is recommended you change your operating system user names and passwords frequently to maintain the effectiveness of this security feature. Refer to your operating system documentation for more information.

If you ordered your computer system with a factory installed SLETC operating system, or have restored a version of the factory installed SLETC operating system, your computer is initially set up with the following user names and passwords:

For administration privileges:

User Name: `admin`

Password: `dell`

For user privileges:

User Name: `thinuser`

Password: `None`

For guest privileges:

User Name: `guest`

Password: `None`

Changing User Names and Passwords

NOTE: To add, remove, or change the privileges of a user with administrative or user privileges, you must be logged into the operating system with administrative privileges. If you are logged into the system with user privileges, you can change only your password.

- 1 From the **Computer** menu, click **Control Panel**→ **Thin Client Users**.
- 2 Highlight the user name whose password you want to change, then click the **Edit User** button.
- 3 Check the **Change Password** checkbox.
- 4 Enter and confirm the password in the appropriate fields.
