Microsoft Office InfoPath 2007

Gather Information Efficiently and Reliably

Office InfoPath 2007 makes information gathering more efficient by delivering electronic forms that reach the necessary participants easily, minimize redundant data entry, and help improve the quality of the data collected.

- **New!** InfoPath forms solutions help you reach more users by providing an easy form fill-in experience across Web browsers, e-mail messages, and mobile devices.

- **New!** Office InfoPath 2007 makes it easy to move your paper-based information-gathering process to electronic forms by converting your existing Microsoft Office Word documents and Microsoft Office Excel® spreadsheets to InfoPath forms.

- **Enhanced!** Office InfoPath 2007 helps you get the right information the first time by providing real-time validation, prepopulated fields, and connections to important sources of information.

- **Enhanced!** InfoPath forms solutions are fully integrated with the Microsoft Office system to
deliver powerful electronic forms capabilities in a familiar package.

Centralize Forms Management and Control

Office InfoPath 2007 and Office SharePoint Server 2007 combine to centralize the deployment and management of forms throughout your organization.

- **New!** InfoPath Forms Services of Office SharePoint Server 2007 helps you get control over your forms solutions by enabling you to centrally manage electronic forms for the entire organization.

- **New!** Office SharePoint Server 2007 provides a unified portal and a forms and content management solution to help you manage electronic forms in the same context as other critical business functions.

- **New!** InfoPath Forms Services helps minimize solution downtime by providing easy upgrades, version management, and monitoring tools.

Streamline Forms-Driven Business Processes

Office InfoPath 2007 integrates easily with your current business applications and systems using industry standards, so you can automate existing business processes without having to reinvent them.

- **Enhanced!** InfoPath forms solutions provide an easy way for your organization to gather and
present information from your existing line-of-business systems using the familiar Microsoft Office interface.

- **New!** With advanced form design and development tools, Office InfoPath 2007 streamlines complex processes using dynamic, interactive forms that connect users to the right data.

- **New!** Office InfoPath 2007 can be hosted within your custom applications or Web pages to extend information gathering into your own environment.
