Data Sheet: Enterprise Security

**Symantec™ Multi-tier Protection**

Trusted protection from malware and spam for multiplatform environments

---

**Overview**

Symantec Multi-tier Protection is designed to safeguard enterprise assets and lower risk by providing unmatched protection against malware for multiplatform enterprise networks, mail servers and mail gateways.

**Endpoint protection**

Symantec™ Endpoint Protection delivers more than world-class, industry-leading antivirus and antispyware signature-based protection. It also provides proven proactive technologies that protect endpoints from targeted attacks and attacks not seen before. It includes turn-key, proactive technologies that automatically analyze application behaviors and network communications to detect and block suspicious activities, as well as administrative control features that allow you to deny specific device and application activities deemed as high risk for your organization—you can even block specific actions based on the location of the user. This multilayered approach significantly lowers risks and gives you the confidence that your business assets are protected. It is a comprehensive product gives you all the capabilities now with the ability to enable the pieces you need, as you need them. Whether the attack is coming from a malicious insider or is externally motivated, endpoints will be protected. Symantec Multi-tier Protection also includes the Symantec AntiVirus™ for Linux® and Symantec AntiVirus™ for Macintosh® solutions.

**Mail protection**

Symantec™ Mail Security helps provide high-performance mail protection against spam, viruses and security risks and enforces company email security policies on SMTP gateways and Microsoft® Exchange and IBM® Domino® servers. Antispam tools include heuristic-based detection, custom filtering rules, and real-time blacklisting and whitelisting.

Symantec also offers a range of consulting, technical education, and support services to guide you through the migration, deployment, and management of Symantec Multi-tier Protection and help you realize the full value of your investment. Essential Support Services provide confidence that your critical assets are protected around the clock. For organizations that want to outsource security monitoring and management, Symantec also offers Managed Security Services to deliver real-time security protection.

---

**Key benefits**

**Secure**

**Industry-best threat landscape intelligence**—Symantec’s protection mechanisms utilize the industry-leading Symantec™ Global Intelligence Network to deliver an unparalleled view of the entire Internet threat landscape. This intelligence results in actionable protection and peace of mind against evolving attacks.

**Multilayered defense**—Includes the integrated Symantec Endpoint Protection solution for Microsoft Windows® operating systems, Symantec AntiVirus for Linux and Macintosh, and the award-winning Symantec Mail Security for SMTP, Symantec Mail Security for Microsoft Exchange, and Symantec Mail Security for Domino solutions. This combination provides heightened protection against the evolving threat landscape for multiplatform networks and protects against email-borne virus threats, spam, and security risks in a turnkey package with guaranteed interoperability.
**Comprehensive protection**—Integrates best-of-breed technologies to stop security threats—even the most devious new and unknown attackers—before they penetrate the network. Detects and blocks malicious software in real time, including viruses, worms, Trojan horses, spyware, adware, and rootkits.

**Proactive protection**—New Proactive Threat Scan uses a unique Symantec technology to score both good and bad behaviors of unknown applications, enhancing detection and reducing false positives without the need to create rules-based configurations.

**Simple**

Easy to install, configure, and manage—Symantec Endpoint Protection makes it easy to enable, disable, and configure desired technologies to fit into your environment.

**Seamless**

**Symantec Network Access Control ready**—Each endpoint becomes “Symantec Network Access Control ready,” eliminating the need to deploy additional network access control endpoint agent software.

**Multi-tiered mail server protection**—Provides best-of-breed multi-tiered spam prevention and advanced content filtering to stop incoming spam and prevent outgoing mail from improperly transmitting proprietary data or content. The optional integrated add-on, Symantec Premium AntiSpam™ service, enhances spam protection and content filtering.

**Key features**

**Much more than antivirus**

**Antivirus and antispyware**—Symantec Endpoint Protection provides unmatched, best-of-breed malware protection, including market-leading antivirus protection, enhanced spyware protection, new rootkit protection, reduced memory footprint, and new dynamic performance adjustments to keep users productive.

**Network threat protection**—Offers a rules-based firewall engine and Generic Exploit Blocking (GEB) that blocks malware before it can enter a system.

**Proactive threat protection**—Provides protection for unseen threats (i.e., zero-day threats). Includes Proactive Threat Scan which does not rely on a signatures.

**Single agent and single management console**—The Symantec Endpoint Protection portion of Symantec Multi-tier Protection provides antivirus, antispyware, desktop firewall, IPS, device control, and network access control (with the purchase of a Symantec Network Access Control license) on a single agent—all managed by a single management console.
Symantec AntiVirus for Linux and Macintosh—Symantec AntiVirus for Macintosh and Symantec AntiVirus for Linux remove viruses from email attachments, Internet downloads, and other sources to safeguard the enterprise network.

Antispam—Symantec Mail Security helps provide high-performance mail protection against virus threats, spam, and security risks and enforces company email security policies on SMTP gateways and Microsoft Exchange and IBM Domino servers. Antispam tools include heuristic-based detection, custom filtering rules, and real-time blacklisting and whitelisting.

System requirements

**Endpoint protection**

**Symantec Endpoint Protection Client**

(Protection software for server, desktop, and laptop systems)

- Operating systems supported: Microsoft Windows Vista™, Microsoft Windows 2003, Microsoft Windows XP, Microsoft Windows 2000 (SP3 and later)

**Symantec Endpoint Protection Manager**

- Operating systems supported: Microsoft Windows 2003, Microsoft Windows XP, Microsoft Windows 2000 (SP3 and later)

**Symantec Endpoint Protection Manager Console**

- Operating systems supported: Microsoft Windows Vista, Microsoft Windows 2003, Microsoft Windows XP, Microsoft Windows 2000 (SP3 and later)

**Symantec AntiVirus for Linux Client**

- Linux distribution supported: Red Hat® Enterprise Linux, SuSE Linux Enterprise (server/desktop), Novell® Open Enterprise Server, VMWare ESX

**Symantec AntiVirus for Macintosh Client**

- Intel® or PowerPC technology–based Mac running Mac OS X 10.3 or higher

**Symantec Administration Console (for Macintosh Client)**

- Operating systems supported: Mac OS X Server 10.3 or 10.4

- Server requirements: Xserve G5, Xserve, Power Mac G5, Power Mac G4, Macintosh Server G4, Power Macintosh G3 (Blue & White), Macintosh Server G3 (Blue & White), iMac, eMac, or Mac mini

- RAM: 256 MB

- Free disk space: 4 GB

- Browsers: Mac OS X 10.2.x–10.4.x, Windows XP Pro + Internet Explorer 6 SP2, Red Hat Linux + Netscape 7

Symantec Multi-tier Protection

Mail protection

Symantec Mail Security for Microsoft Exchange
Server installation system requirements

- Operating systems supported: Windows 2000 Server/Advanced Server/Data Center (SP4), Windows Server® 2003 Standard/Enterprise/Data Center (SP1), Microsoft Windows Server 2003 x64 or Windows Server 2003 R2 x64, Standard or Enterprise Edition

Console-only installation system requirements

- Operating systems supported: Windows 2000 (SP4), Windows 2003 (SP1), Windows XP (SP1)

Exchange Server 2007

- x64 architecture–based computer with Intel processor that supports Intel Extended Memory 64 technology (Intel EM64T), or AMD processor that supports the AMD64 platform
- 2 GB RAM minimum

Symantec Mail Security for Domino

- Operating systems supported: Lotus® Domino Server versions 6.5.x and 7.x (Windows only)

Symantec Mail Security for SMTP

- Hardware requirements: Intel Pentium 4 processor or compatible (Windows and Linux), UltraSPARC processor (Sun™ Solaris™ operating system)
