

# Accelerate IT Modernization with Hyperconverged Infrastructure (HCI)

Patrick Weigl

# Accelerate IT Modernization with Hyperconverged Infrastructure

VMware vSAN is Integrated in VMware vSphere

Pools local NVMe/SSDs/HDDs into a shared datastore

Delivers enterprise-grade scale and performance

Simpler Management through per-VM storage policies

Non-disruptive activation and various use-cases

# Innovation Continues to Drive HCI Adoption through VMware vSAN

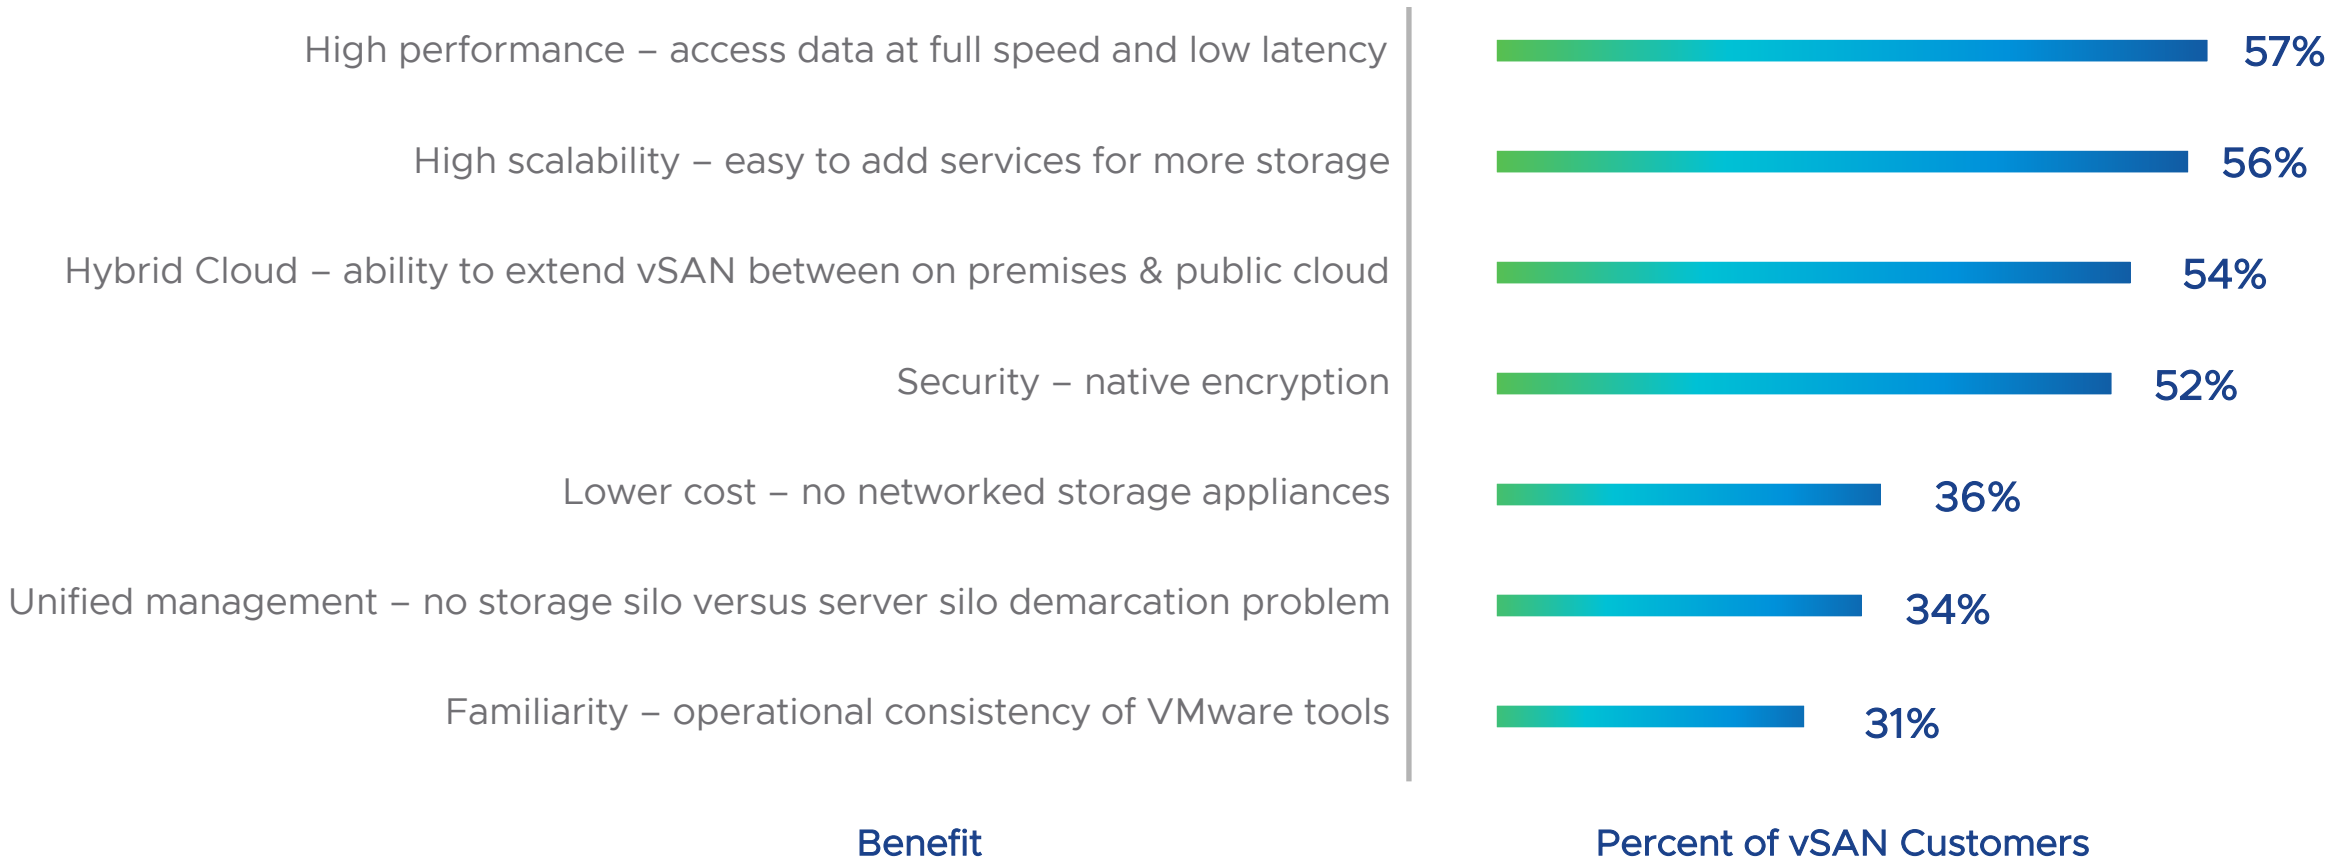

>30,000 Customers

**Honeywell**

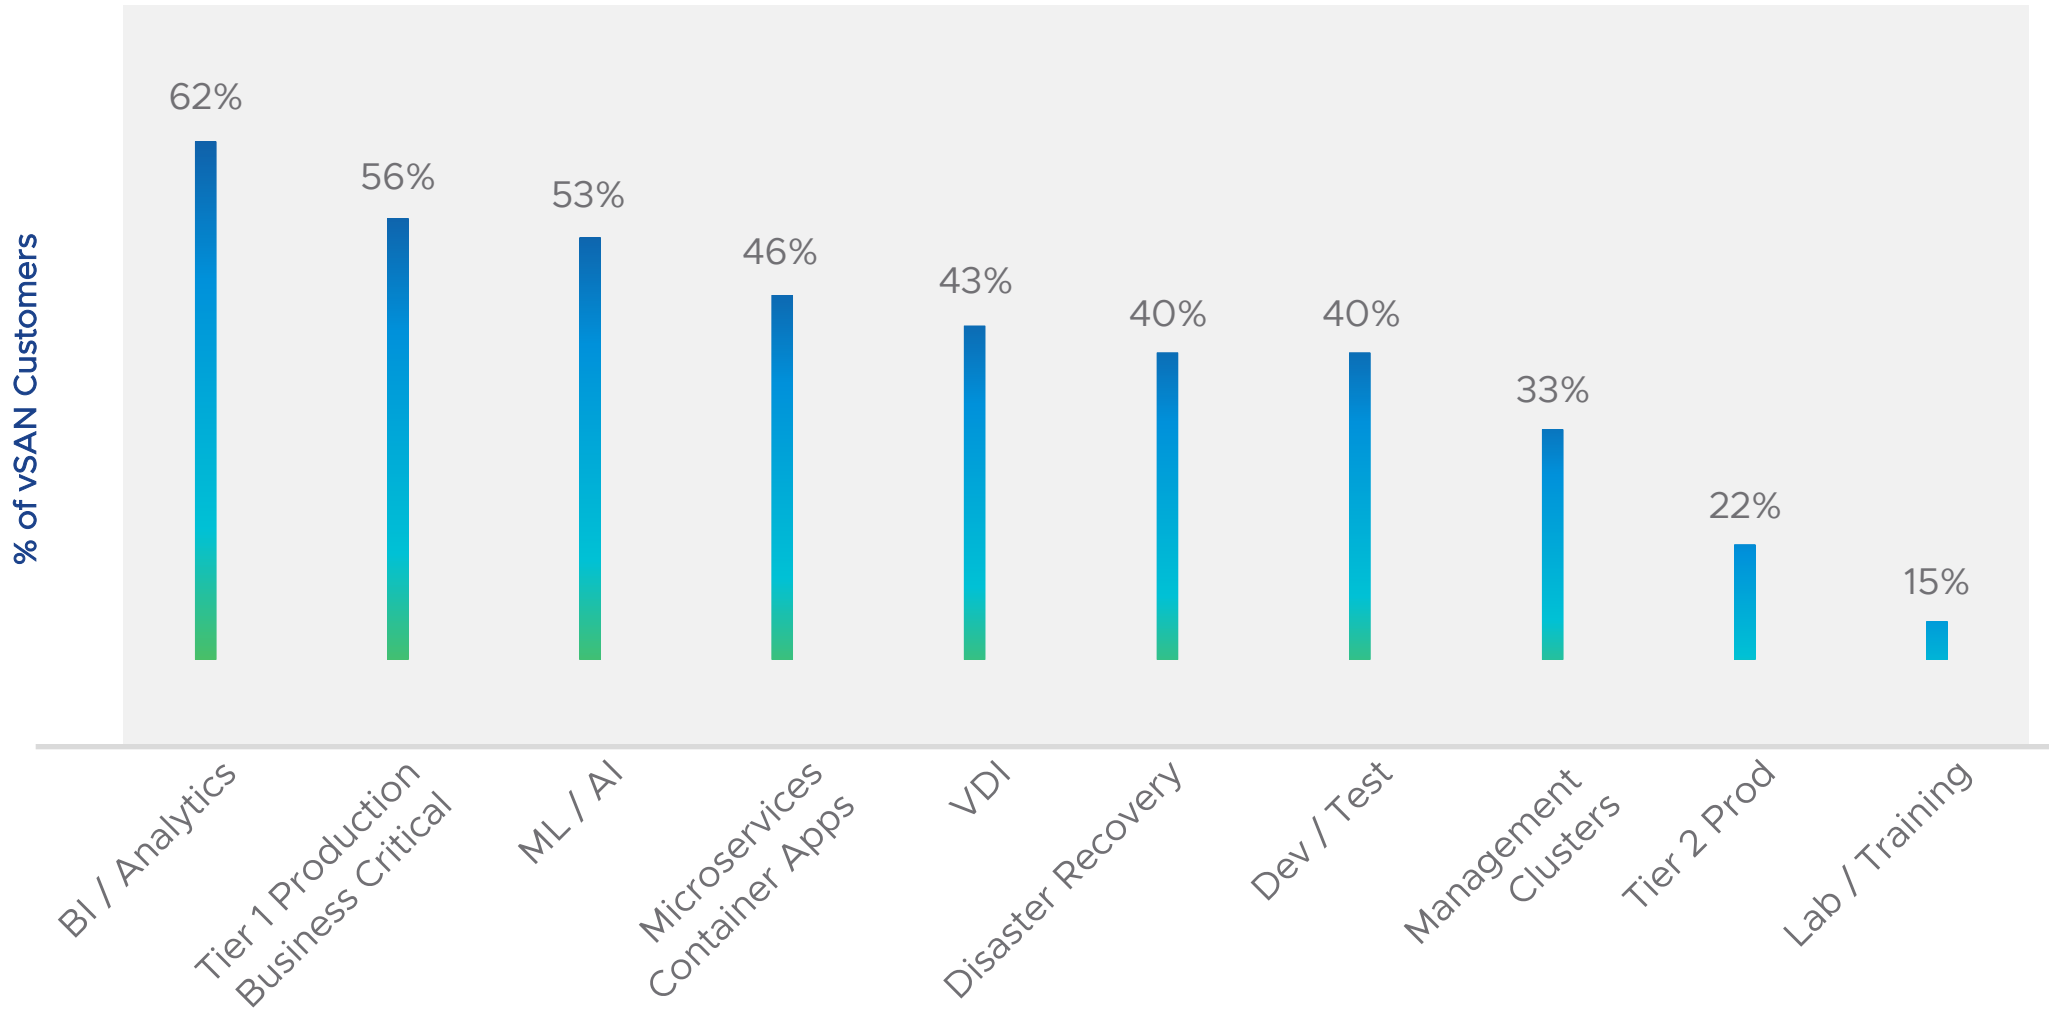

# VMware vSAN Provides Powerful Hyperconverged Infrastructure

## vSAN Benefits Observed by Customers

# How Customers Use VMware vSAN

vSAN Avg. # Apps Deployed : 630

# VMware HCI Powers Any Application

Block and File Interface from vSAN; Object Interface with Partners

## Business-Critical

Logos for Business-Critical applications: Microsoft SQL Server, Microsoft Exchange, MySQL, Oracle, SAP HANA, Meditech, Epic, InterSystems, VMware Horizon, Citrix XenDesktop/App.

## Cloud-Native / Next-Gen

Logos for Cloud-Native / Next-Gen applications: DataStax, Splunk, Cloudera, Hadoop, AI/ML (PyTorch, TensorFlow), Cockroach DB, Elasticsearch, MongoDB, Kafka, Cassandra, Redis.

## Development Platforms

Logos for Development Platforms: VMware Tanzu, PKS, Pivotal Cloud Foundry, OpenShift, Rancher.

## Persistent Storage Partners

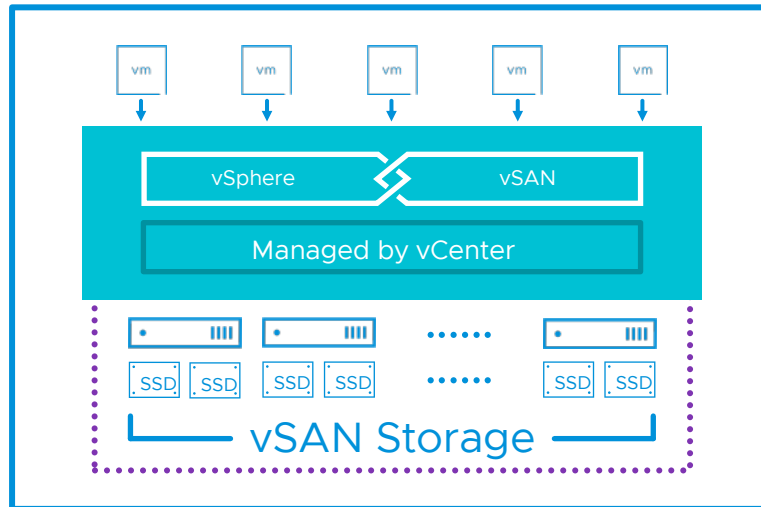

Logos for Persistent Storage Partners: Cloudian, Minio, Dell Technologies, DataStax.

# The Power of Choice

On-premises, self-managed consumption models for vSAN

 VxRail

- Turnkey deployment
- Configurable
- Tight Integration
- Fully loaded

vSAN ReadyNode™

- Existing and new DellEMC PowerEdge Server
- BYO or purchase licensing with platform
- Vendor support
